Micro USB Charging Cable

INSTALLATION

How to Install

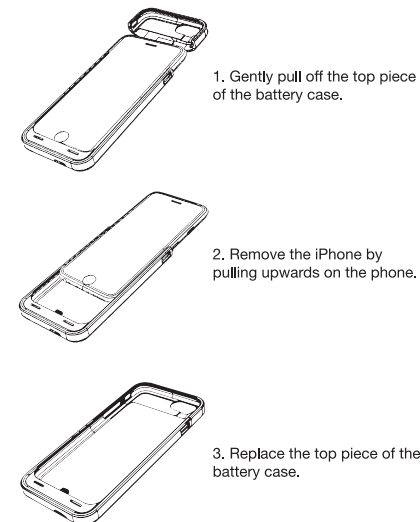

1. Remove the top piece of the battery case.

2. Insert the iPhone into the case.

3. Re-attach the top piece of the battery case.

HOW TO CHARGE

How to Uninstall

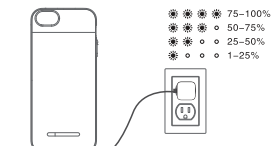

1. Gently pull off the top piece of the battery case.

2. Remove the iPhone by pulling upwards on the phone.

3. Replace the top piece of the battery case.

CHARGING & CONTROLS

Charging the Battery Case

1. Connect the case to any USB charging port via the provided USB cable, and the case will start charging. The LED indicator will flash when charging, and it will become steady when fully charged.
2. If you are going to charge the case and iPhone together, make sure to install the case on the iPhone before connecting them to a power source. The external power source will fully charge the iPhone first, then recharge the case.

How to Charge the iPhone

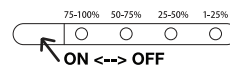

1. Place the iPhone into the Atomic Power case.
2. PRESS and HOLD the power switch button for two seconds, the case will begin to charge.
3. When charging starts, the iPhone will vibrate or make a "Beep" sound.
4. The battery icon on the upper right corner of the screen will feature a lightning bolt to indicate that charging is in progress.

GENERAL FAQ

When powering on the battery case, the LED lights will light up to show the remaining power in the case as follows:

Power is switched off by default. To manually turn the charger ON or OFF, PRESS and HOLD the button for two seconds.

Synchronization

The battery case supports sync-through technology. This means that you can sync your iPhone to a computer without having to take the battery case off. Simply plug the micro-USB cable into the battery case and the other end into the computer's USB slot. Synchronization will begin immediately.

Specifications

Battery type:	Li-polymer
Capacity:	3.7V/3200mAh
Input:	DC 5V/1A (Max)
Output:	DC 5V/1A
Dimension:	152.7*70.9*14.5(mm)

GENERAL FAQ

Q: Does this case work with the stock lightning Earpods?

A: No, the case only works with bluetooth connected headphones including the Apple Airpods.

Q: How do I use headphones with this product?

A: Since, this case uses an external micro-USB port, there is currently NO way to directly connect headphones to the phone. This case is only compatible with bluetooth headphones, including Apple Airpods.

Q: Does the 3.5mm to lightning adapter work for this case?

A: The case only uses a micro-USB port, which is not compatible with the Apple headphone adapter.

Q: The case does not charge. What should I do?

A: Try using a different micro-USB cable and/or a different USB wall charger.

Q: The case does not charge the phone. What should I do?

A: Uninstall and reinstall the battery case onto the phone. If necessary, try to clean the connection between the phone and the battery case.

GENERAL FAQ

Q: How long does it take to charge the battery case?

A: Depending on the power source used, it usually takes 4-7 hours to fully charge the battery case.

Q: How many times will this charge the phone?

A: Depending on the phone usage during the charge, the battery case should be capable of fully charging the phone once.

Q: Will this case work with a screen protector?

A: Most screen protectors that leave the edges free around the phone will work with the case. Edge-to-edge protectors may not work since they cover the edges.

Q: Does this battery case use a micro USB to charge or a lightning cable?

A: The battery case charges with a micro USB cable.

Q: What does the one-year warranty cover?

A: Maxboost is proud to offer a one-year warranty on its battery cases. We will provide coverage of our products for the extent of the products life. If a defect in material or workmanship arises with your Maxboost product due to a manufacturers defect, case degradation, or normal wear and tear and a valid warranty claim is received by Maxboost, we will gladly replace your product.
